- Flask ●●●●●
- Python ●●●●●

## Summary

I am a **Full Stack Developer and DevOps Specialist** with over **8 years** of experience in developing **web and desktop applications, creating REST APIs**, and managing **DevOps** processes. In 2020, I founded my own company and decided to return to the corporate world after 4 years.

I specialize in developing **REST APIs using Python (Flask) and ASP.NET Core**. I am proficient in web technologies such as **HTML, CSS, Java, and JQuery**, and I have developed extensive web applications with Flask. Additionally, I have experience in deployment and cloud environment management in **Azure and Google Cloud** environments.

For the past 3 years, I have been involved in the development of Trendify's **AI application, Prowth**, where I handled backend development and DevOps process management. For 1.5 years, I served as a **Software Team Leader**, guiding and managing development teams to achieve project goals.

Since 2012, I have been producing software content on my personal blog.

## Education

- Industrial Engineering** 2011 - 2016  
Süleyman Demirel University, Isparta  
3.21 GPA - 2nd in Department
- High School - Science** 2006 - 2011  
SSüleyman Demirel Anatolian High School, Aydın

## Experience

- Full Stack Developer - Software Team Lead** Feb 2021 - Jun 2024  
Trendify, İstanbul, Türkiye  
I developed the Back End REST APIs for the AutoML (AI) application that the company is developing. I managed the DevOps processes. I led the software team for 1.5 years. I developed projects using image processing tools in Vision API writing with Python. I wrote an OCR application using Tesseract, which I named TFinderImage.
- Founder** Jan 2020 - Oct 2023  
Brainy Tech, Aydın, Turkey  
Brainy Tech; my Software and Technology company that I founded. For 4 years, we provided businesses with services in Mobile, Web, and Desktop Solutions - Social Media, Advertising, and Content Management - Digital Design.
- Founder** May 2016 - Sep 2022  
Industryolog Academy & NGenius, Aydın, Türkiye  
The educational and industrial engineering platform I established. We provided monthly trainings to student friends. We produced our own projects. We published 6 Industrial Engineering Journals.

NGenius is the Engineering - Science and Software platform I founded. With

## Hobbies and Interests

- Writing Blogs
- Making Music with FL Studio
- Driving Cars

this platform, where my team and I focused on producing social media content, we reached 200K followers on Instagram in 2022.

### Troia Developer - Canias ERP Consultant

Aug 2016 - Nov 2018

EKS Yazılım ve Bilgi Teknolojileri, Eskişehir

In 2016, I started my first job experience at EKS, where I provided consultancy services for the transition project of Alp Aviation to Canias ERP and developed improvements with Troia.

### Editor in Chief

Jul 2015

[muratbilginer.net](#), Kurucu & Genel Yayın Yönetmeni

I create content on my website, which is widely followed in the fields of Industrial Engineering and Software.

## Volunteer Projects

### Developer

2012 - 2013

[The Hydrogen-Powered Car Project - TUBITAK](#)

We participated in TUBITAK's Alternative Energy Vehicle Races with a team of 40 people, designing and manufacturing a hydrogen-powered prototype car. I developed the necessary C# and Arduino software for remote control of the vehicle.

### Volunteer Young Leader

2012 - 2015

[Ministry of Youth and Sports, Isparta](#)

In university, I volunteered as a Young Leader, assisting elementary and high school students in their educational processes.

## Certificates

### Young Entrepreneur Certificate

Jan 2020

I completed the Young Entrepreneur training provided by KOSGEB to take advantage of the benefits offered to young entrepreneurs during the company establishment process.
